Microsoft

Threat Protection with XDR and SIEM
a Microsoft preferred solution

AIT AccountabilIT

Combine our 24x7 SOC with Microsoft's SIEM to strengthen your security posture and protect your business from ongoing threats.

Microsoft Sentinel + AIT Managed and Project based Security Services

Highlights

Monitored and managed security 24x7.

Quickly strengthen your security posture and protect against threats.

Defined deployment roadmap based on your environment and goals.

Custom-tailored security strategy.

Focus your attention on running and growing your business.

Security Copilot: Prompt Engineering, workflow integration and optional co-management

Start using Microsoft XDR and/or SIEM technologies immediately, automatically scale to meet your organizational needs, and only pay for the resources you need.

AccountabilIT can help you deploy your first instance of Sentinel with all your requirements in mind. Together, we can build a proper cloud-native SIEM experience, all within Microsoft Azure.

Integrate with existing tools, whether business applications, other security products, or home-grown tools, and use your own machine-learning models. Optimize for your needs by bringing your own insights, tailored detections, machine learning models, and threat intelligence. Invest in security, not infrastructure setup and maintenance with the first cloud-native SIEM from a major cloud provider.

Never again let a storage limit or a query limit prevent you from protecting your enterprise.

## Custom solutions for your unique organization

Every organization is different. We tailor our solutions to fit your environment and goals.

Remote monitoring

If your organization doesn't have its own security operations center (SOC) or if you want to offload some monitoring tasks, AccountabilIT can perform remote monitoring and threat hunting for you.

Joint threat exploration

If your organization is interested in learning how to integrate Microsoft Sentinel into your existing SOC by replacing or augmenting an existing SIEM, we will work with your SecOps team and provide additional readiness to bring them up to speed.

https://info.accountabilit.com/securitysimplicity

Offer Includes:

- Deployment of Microsoft Sentinel, Log Analytics, Logic Apps and Automation

- Configuration and testing of all applicable Microsoft Sentinel data connectors

- Entity configuration mapping for optimal Sentinel investigations

- Microsoft Sentinel data collection review and tuning, including rule templates

- Formal engineering review of dashboards and incident triggers

- 24x7 Security Operations Center monitoring and alerting

- Security Copilot: Prompt Engineering, workflow integration and optional co-management

Without outsourcing or subcontracting, we carry out all stages, end-to-end.

You own it.

Our pioneering use of Azure Lighthouse allows you to own and control your environment, while we manage it for you; all SIEM resources are in your tenant. We know we don't need to hold you hostage in our system because we earn your loyalty and trust every day with our service delivery.

What we'll do:

Analyze your requirements and priorities for a SIEM deployment

Define scope & deploy Azure Sentinel in your production environment

Remote monitoring* and proactive threat hunting to discover attack indicators *optional component

Build a customized play book for your organization

Continuously improve with Microsoft's ever-evolving security stack including AI.

Why AccountabilIT?

As one of just a few partners with Microsoft's **Threat Protection** and **Cloud Security Advanced Specializations**, we take security seriously. We are honored to be recognized as a Microsoft Security Solutions Partner.

You need an experienced partner with a record of excellence. AIT, a Soc 2 Type 2 organization, is proud to have been recognized for the past 6 consecutive years as one of the top 250 MSSPs worldwide by MSSP Alert.
